

# Personal Emergency Response Systems

Featuring Exclusive Emergency Medical Data Service

By MedScope®

Since 1990, MedScope America Corporation has provided medical alarm monitoring to thousands of people throughout North America. **Our staff of specially trained operators stands waiting to assist you with your emergency 24 hours a day 365 days a year.** Simply press the emergency button, and within seconds our operators will establish two-way voice communication, assess your emergency, and dispatch the appropriate help. Uncompromising excellence has allowed our company to become the nation's leading and most trusted name in emergency medical monitoring.

We speak your language. MedScope answers emergency calls in any of **140 different languages**.

Our on-line **emergency medical data service** gives emergency personnel and physicians access to your medical record containing medications, drug allergies, and necessary information to assure faster and safer medical treatment. This avoids medical errors and adverse drug interactions. No need to remember your information or that "piece of paper".

Add 1 or more specially designed smoke detectors, and the system **doubles as a centrally monitored fire alarm system**. In the event of a fire, the smoke detector automatically activates the emergency system and our operator will immediately dispatch the fire department.

MedScope offers **key lock boxes** allowing safe, efficient entry by emergency personnel.

Through the use of Assistive Technology, **we are now able to offer the Personal Emergency Response System to the physically handicapped**. At MedScope, we have developed transmitters and activation devices that allow the system to be used by those who, until now, have been unable to do so.

MedScope is a professional service offering the finest in equipment and monitoring. When you need to trust your safety, or the safety of a loved one, call on MedScope. We are professionals who care.

**800-645-2060**

We participate in most medical assistance programs. Call us to see if you qualify.

# FACT SHEET

- Of the 35 million Americans over 65, about 1 in 3 will fall in a given year.  
**(Center for Disease Control, “CDC”)**
- Seniors are hospitalized for fall-related injuries 5 times more often than they are for injuries from all other causes. Falls are the leading cause of accidental death for seniors.  
**(Center for Disease Control, “CDC”)**
- 50% of people who fall require assistance from someone else to get up.  
**(Advance for Providers of Post-Acute Care)**
- After a fall or other emergency, 90% of people who get help within one hour will continue independent living, but after 12 hours down only 10% of people will continue to live at home.  
**(New England Journal of Medicine, “NEJM”)**
