

Monitored Medication Dispenser

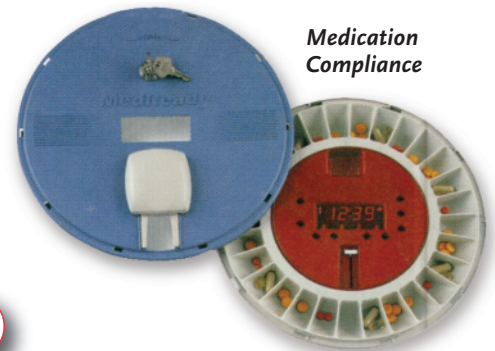

MedScope
Emergency Response and Data Services

- Right Pill - Right Dose - Right Time -

The MedScope Medication Dispenser offers a convenient, reliable way for consumers to remain on schedule with their prescribed medications. The internal tray will rotate and dispense the needed medication up to four times a day, seven days a week (28 doses in each tray). When a medication is to be taken, an alarm will alert the consumer. If the consumer does not take the dosage within 30 minutes, our response operator will contact the consumer as a further reminder to take their

medication. This will help the consumer to take the needed medication in a timely fashion, without the possibility of skipped doses or overmedication. All activity is posted to a private website so Caregivers may track their loved ones activity from anywhere!

MedScope Medication Dispenser Features

- > Calls MedScope Monitoring Center if medicine dose is not taken (MedScope Personal Emergency Response System Required).
- > Posts all activity to private internet site for remote tracking by Caregivers.
- > Pill tray rotates to the next dose when the next audible alarm sounds. Only the most recent medication dose is available. If a patient misses a dose, the pill dispenser denies access to the second dose.
- > Pill compartments are designed to fit adult fingers and “ramped” for easy removal of medication. Compartment divisions keep medications in place.
- > “Time for medicine” alarm beeps 5 seconds on, 1 second off continuously until the medication door is slid open and the “off” position is activated. A flashing light also helps to notify the consumer when it is time to take their medicine.
- > Medication Dispenser holds 28 doses of dry medication such as pills or capsules.
- > Security: Medication Dispenser is tamper-proof to provide the maximum in security. Instead of employing a latch, our system utilizes a real lock and key. With access by key-only, caregivers can load the dispenser and monitor patient compliance.
- > Useable Clock: The extra large LED read-out is easily viewed from any angle and is self-illuminating so it can be seen in any light. LED displays the time and aids setting alarm.
- > Medication Card Holder: Medication Dispenser provides a card holder on the bottom of the unit for a printed copy of the prescriptions for all medications in the dispenser.
- > Power: A Rechargeable nickel-metal-hydride battery pack for travel/power outages is supplied. Battery Pack provides 72 hours of power.
- > Patient only needs one phone line, even with a MedScope Emergency Response System.
- > Audible Alarm is 90dB, 2800-3000 Hz.
- > Low monthly monitoring fee.
